

Kempinski Hotel  
Zografski

SOFIA

To Whom It May Concern

Dear Ladies and Gentlemen,

Kempinski Hotel Zografski Sofia has worked with Grundfos Bulgaria EOOD since 2009 on a project of building up new installations for water treatment system meant to prevent the penetration of different bacteria. The company has put into operation the Oxiperm Pro 60 gr. CLO2 generator, several Digital Dosing Pumps and a measuring system delivered by Grundfos Bulgaria EOOD.

Grundfos Bulgaria EOOD was very fast in quoting the prices, strictly adhered to the delivery time schedule stated in the contract and secured assistance by the company specialists at the time of the start-up and commissioning of the pumps. In addition, the performance of the above mentioned pump equipment was up to our expectations.

Grundfos Bulgaria EOOD has proved to be a reliable and professional partner and we can recommend it for any activity in the above-mentioned sphere.

Stefan Schwind
